Tablet Solution for libraries

Secure and easy self-service solution for offering tablet loans

Hublet keeps your tablets locked, charged and organized in one place. You can remotely manage an unlimited number of units, create new content, get statistics and create different user profiles. Tablets can be used on pre-defined networks only. Hublet is available with 3 or 6 tablets.
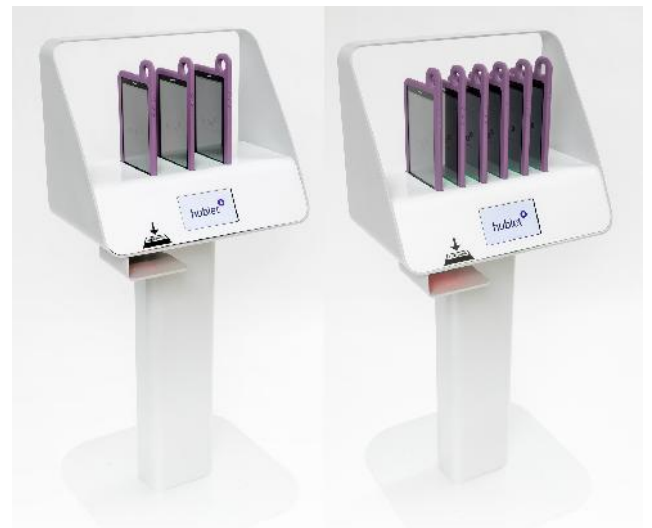

Secured user privacy

The user can be identified by a library card or a PIN code. The privacy of the user is secured: the user-specific information is automatically wiped when the tablet is returned to the docking station; this is important when considering the requirements of the General Data Protection Regulation (GDPR).

Authentication methods:

- Manual library card entry or integrated barcode reader
- RFID identification option
- Integration into the library management system
- Possibility to create your own PIN codes

Hublet is available with 3 or 6 tablets – suitable for bigger or smaller libraries

Multiple ways of using Hublet

- Replace public PCs
- Convenient way to get familiar with digital services
- Platform for providing library e-materials
- Offer user-targeted materials and desktops
- Tool for training and education
- Tool for collecting feedback and data
- Staff tool for operating the library management system
